

Phil's Computer Repository is committed to providing the best shopping experience for your new desktop. All desktops have been carefully selected to maximize reliability and performance to price ratio.

Office PC

Office-use desktops are designed with an emphasis on the CPU to allow for multitasking, Microsoft Office documents, and browsing the web. The cases are chosen to be as small and minimalistic as possible with no flashy lights or distractions for the office environment.

Gaming Desktops

Modern gaming desktops are able to perform as an all-around system for any intensive tasks such as gaming, streaming, 3D rendering, and video editing. Different gaming desktop tiers are available with either Intel or AMD Ryzen processors.

Phil's Computer Repository is committed to providing the best shopping experience for your new desktop. All desktops have been carefully selected to maximize reliability and performance to price ratio.

How it works

1. Select your build

Select your preferred build in the following pages. Each Tier is comprised of balanced systems at different price points. Further customizations are possible upon customer Request.

2. Select your case

Once you have selected your preferred build, you can choose your case. The case is one of the only components that the customer can choose to show off their stylistic preferences. You can choose any case in the Gaming Mid-Tower Cases section. Premium cases are available for an extra cost.

3. Select accessories/upgrades if required

Once you have your build and case selected, you can decide to purchase accessories, upgrades, or peripherals.

4. Choose payment option and shipping/delivery method

Most customers prefer to conduct payment via a **Korean Bank Transfer** as it is easy and immediate. Customers can also pay in cash in person, Credit Card, or PayPal. Please keep in mind that paying by Credit Card or PayPal incurs additional fees. If the payment is processed by noon of a given business day (weekday), the desktop will typically be built by the evening of the same business day. Once the desktop is ready, customers can pick it up in person, ask to have it shipped, or sent by Quick Service Courier (only for Seoul and Greater Seoul Residents). Shipping is free for all computer purchases, typically takes one business day, and is fully insured.

Phil's Computer Repository is committed to providing the best shopping experience for your new desktop. All desktops have been carefully selected to maximize reliability and performance to price ratio.

Included Software

Genuine English Windows 11 Pro (Other Languages are available upon request)
All necessary drivers and utilities
No Bloatware

Warranty Policy

All of the desktops featured in this document use brand new components unless otherwise requested. Every new computer purchase is accompanied with a 1 year parts and labor warranty. Additionally, all of the individual components will carry their own manufacturer's warranty which vary between 2-10 years depending on the component and the brand.

The 1 Year Parts and Labor Warranty covers the following, but is not limited to:

- Components that fail with no fault of the user
- Damages incurred from shipping
- Glitches in Windows due to a corrupted windows installation, updates and/or drivers

The Parts and Labor Warranty Policy does not cover:

- Hardware failure due to improper overclocking
- Any user-inflicted damage (ex. liquid damage, physical trauma, bug infestation, etc.)
- Return shipping costs for warranty coverage.

In the event that repairs are needed but are not covered under the 1 year warranty policy or after the 1 year period, Phil's Computer Repository will conduct repairs at normal customer rates.

FAQ

Q. What brands do you use for your builds?

A. Following the philosophy of maximizing reliability, reputable international brands are used for every component.

SSD: Western Digital, Micron Crucial, Samsung

Graphics Card: Gigabyte, MSI, Asus, Zotac, Galax

Motherboard: Gigabyte, Asus, MSI, Asrock

Ram: Samsung, G.Skill, TeamGroup, Corsair, Micron Crucial

Power Supply: Antec, Corsair, Seasonic, EVGA

Coolers: Corsair, DeepCool, NZXT, Arctic

Q. How are the prices for each build calculated?

A. The prices for each build is broken down to the total retail cost of the components (Danawa Virtual Estimate Prices) + 100-200,000 KRW for the professional physical assembly, software package which includes Genuine Windows, and the 1 Year Parts and Labor Warranty Policy.

Q. Is the software that is included with each build genuine?

A. All of the software, including Windows, is genuine.

Q. (For American customers) I have noticed that prices of several components in Korea are more expensive than what I can get from home.

What are the advantages with ordering through you?

A. For brand name consumer electronics, which includes computer components, the USA has the cheapest market in the world. However, any potential customer should also calculate additional shipping and customs fees when importing electronics from overseas. Customers should also keep in mind that if any of those items require warranty support, they would have to ship it back to the USA at the buyer's expense and wait weeks/months for warranty support. On the other hand, the turnaround time for warranty support in Korea is typically several days.

Office PC

Basic Tier

CPU: Intel i3 14100
3.50-4.70GHz (4 Core, 8 Threads)
Motherboard: Asrock B760M-HDV/M2 D5 Wifi6E/BT
Ram: Samsung 8GB DDR5 5600Mhz
Graphics: Intel Graphics
SSD: 500GB SSD NVME M.2
Power: M-ATX 450W
Case: 2MONs L-POSE 8 Type C

Price: 699,000

- Add 40,000 to upgrade the SSD to 1TB NVME M.2
- Add 30,000 to upgrade the RAM to 16GB (100,000 for 32G)

Intermediate Tier

CPU: Intel i5 14400
2.5-4.7GHz [10 Core(6 Power/4 E), 16 Threads]
Motherboard: Asrock B760M-HDV/M2 D5 Wifi6E/BT
Ram: Samsung 16GB DDR5 5600Mhz
Graphics: Intel Graphics
SSD: 500GB NVME M.2 SSD
Power: M-ATX 450W
Case: 2MONs L-POSE 8 Type C

Price: 859,000

- Add 40,000 to upgrade the SSD to 1TB NVME M.2
- Add 70,000 to upgrade the RAM to 32GB

Advanced Tier

CPU: Intel i7 14700
2.1-5.4GHz [20 Core(8 Power/12 E), 28 Threads]
Motherboard: Asrock B760M-HDV/M2 D5 Wifi6E/BT
Ram: Samsung 32GB DDR5 5600Mhz
Graphics: Intel Graphics
SSD: 500GB NVME M.2 SSD
Power: M-ATX 450W
Case: 2MONs L-POSE 8 Type C

Price: 1,174,000

- Add 40,000 to upgrade the SSD to 1TB NVME M.2

Tier 1-3 (out of 9)

These entry tier gaming desktops are great for those who want to play casual games such as League of Legends, Fortnite, Apex Legends, Dota 2, and other popular games that don't require high-end hardware.

AMD Gaming Desktop

Tier 1

CPU: AMD Ryzen 5 8500G
3.50-5.0GHz (6 Core, 12 Threads)
Motherboard: MSI B650M-P
Ram: Crucial 16GB DDR5 5600Mhz
Graphics: AMD Integrated Radeon Graphics
SSD: 500GB SSD NVME M.2
Power: Antec CSK 650 80Plus Bronze
Case: Gaming Mid-Sized Case

Price: 859,000

- Add 180,000 to upgrade the CPU to the Ryzen 7 8700G 4.2-5.1GHz (8 core, 16 Threads)
- Add 70,000 to upgrade the Ram to 32GB DDR5 5600Mhz
- Add 40,000 to upgrade the SSD to 1TB NVME M.2
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

Tier 2

CPU: AMD Ryzen 5 5600X
3.7-4.6GHz (6 Core, 12 Threads)
Motherboard: Gigabyte B550M Aorus Elite
Ram: Samsung 16GB DDR4 3200Mhz
Graphics: Nvidia RTX 3050 6GB
SSD: 500GB SSD NVME M.2
Power: Antec CSK 650 80Plus Bronze
Case: Gaming Mid-Sized Case

Price: 1,054,000

- Add 60,000 to upgrade the Ram to 32GB 3200Mhz
- Add 40,000 to upgrade the SSD to 1TB NVME M.2
- Add 30,000 to upgrade Motherboard with integrated WIFI/BT

Tier 3

CPU: AMD Ryzen 5 5600X
3.7-4.6GHz (6 Core, 12 Threads)
Motherboard: Gigabyte B550M Aorus Elite
Ram: Samsung 16GB DDR4 3200Mhz
Graphics: Nvidia RTX 4060 8GB
SSD: 500GB SSD NVME M.2
Power: Antec CSK 650 80Plus Bronze
Case: Gaming Mid-Sized Case

Price: 1,224,000

- Add 60,000 to upgrade the Ram to 32GB 3200Mhz
- Add 40,000 to upgrade the SSD to 1TB NVME M.2
- Add 30,000 to upgrade Motherboard with integrated WIFI/BT

Tier 4-6 (out of 9)

Intel Gaming Desktop

Tier 4

CPU: Intel i5 14400 (F)
2.5-4.7GHz [10 Core(6 Power/4 Efficiency), 16 Threads]
Motherboard: MSI B760M-P
Ram: Crucial 16GB DDR5 5600Mhz
Graphics: Nvidia RTX 4060 8GB
SSD: 500GB SSD NVME M.2
Power: Antec CSK 650 80Plus Bronze
Case: Gaming Mid-Sized Case

Price: 1,419,000

- Add 40,000 to upgrade the SSD to 1TB NVME M.2
- Add 70,000 to upgrade the Ram to 32GB
- Add 45,000 to add the DeepCool AK400 Aftermarket Cooler (Intel Stock Cooler used otherwise)
- Add 30,000 to upgrade Motherboard with integrated WIFI/BT

Tier 5

CPU: Intel i5 14400 (F)
2.5-4.7GHz [10 Core(6 Power/4 Efficiency), 16 Threads]
Motherboard: MSI B760M-P
Ram: 32GB DDR5 6000Mhz
Graphics: Nvidia RTX 4060 TI 8GB
SSD: Western Digital SN580 1TB NVME
Power: Antec CSK 650 80Plus Bronze
Case: Gaming Mid-Sized Case
Cooler: DeepCool AK400

Price: 1,749,000

- Add 30,000 to upgrade Motherboard with integrated WIFI/BT

Tier 6

CPU: Intel i5 14600K (F)
3.5-5.3GHz [14 Core(6 Power/8 Efficiency), 20 Threads]
Motherboard: Gigabyte B760M Aorus Elite
Ram: 32GB DDR5 6000Mhz
Graphics: Nvidia RTX 4070 Super 12GB
SSD: WD Black SN850X 1TB PCIE 4.0 NVME
Power: EVGA 750 GA 80Plus Gold
Case: Gaming Mid-Sized Case
Cooler: DeepCool AK620

Price: 2,429,000

- Add 100,000 to upgrade the SSD to 2TB NVME M.2
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

AMD Gaming Desktop

Tier 4

CPU: AMD Ryzen 5 7600
3.8-5.1GHz (6 Core, 12 Threads)
Motherboard: MSI B650M-P
Ram: Crucial 16GB DDR5 5600Mhz
Graphics: Nvidia RTX 4060 8GB
SSD: 500GB SSD NVME M.2
Power: Antec CSK 650 80Plus Bronze
Case: Gaming Mid-Sized Case

Price: 1,369,000

- Add 40,000 to upgrade the SSD to 1TB NVME M.2
- Add 70,000 to upgrade the Ram to 32GB
- Add 45,000 to add the DeepCool AK400 Aftermarket Cooler (AMD Stock Cooler used otherwise)
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

Tier 5

CPU: AMD Ryzen 5 7600
3.8-5.1GHz (6 Core, 12 Threads)
Motherboard: MSI B650M-P
Ram: 32GB DDR5 6000Mhz
Graphics: Nvidia RTX 4060 TI 8GB
SSD: Western Digital SN580 1TB NVME
Power: Antec CSK 650 80Plus Bronze
Case: Gaming Mid-Sized Case
Cooler: DeepCool AK400

Price: 1,719,000

- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

Tier 6

CPU: AMD Ryzen 5 7600X
4.7-5.3GHz (6 Core, 12 Threads)
Motherboard: Gigabyte B650M Aorus Elite
Ram: 32GB DDR5 6000Mhz
Graphics: Nvidia RTX 4070 Super 12GB
SSD: WD Black SN850X 1TB PCIE 4.0 NVME
Power: EVGA 750 GA 80Plus Gold
Case: Gaming Mid-Sized Case
Cooler: DeepCool AK620

Price: 2,359,000

- Add 100,000 to upgrade the SSD to 2TB NVME M.2
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT
- Add 120,000 to upgrade the CPU to the AMD Ryzen 5 9600X 3.9-5.4 GHz (6 Core, 12 Threads)

Tier 7-9 (out of 9)

Intel Gaming Desktop

Tier 7

CPU: Intel i5 14600K (F)
3.5-5.3GHz [14 Core(6 Power/8 Efficiency), 20 Threads]
Motherboard: Gigabyte B760M Aorus Elite
Ram: 32GB DDR5 6000Mhz
Graphics: Nvidia RTX 4070 TI Super 16GB
SSD: Western Digital SN850X 2TB PCIE 4.0 NVME
Power: Seasonic GX-850 80Plus Gold
Case: Gaming Mid-Sized Case
Cooler: DeepCool AK620

Price: 2,990,000

- Add 140,000 to upgrade CPU to the Intel i7 14700K(F)
- Add 300,000 to upgrade GPU to the RTX 4080 Super 16GB
- Add 40,000 to Upgrade Motherboard with integrated WIFI/BT

Tier 8

CPU: Intel i7 14700K (F)
3.4-5.6GHz [16 Core(8 Power/8 Efficiency), 24 Threads]
Motherboard: Gigabyte Z790 Aorus Elite
Ram: 32GB DDR5 6000Mhz
Graphics: Nvidia RTX 4080 Super 16GB
SSD: Western Digital SN850X 2TB PCIE 4.0 NVME
Power: Seasonic GX-1000 80Plus Gold ATX 3.0
Case: Gaming Mid-Sized Case
Cooler: 240MM/280MM/360MM Liquid Cooler
(Corsair/NZXT/DeepCool/Arctic)

Price: 3,850,000

- Add 150,000 to upgrade the RAM to 64GB (32GBx2)
- Add 250,000 to upgrade CPU to the Intel i9 14900K (F)
- Add 1,850,000 to upgrade GPU to the RTX 4090 24GB
- Add 40,000 to Upgrade Motherboard with integrated WIFI/BT

Tier 9

CPU: Intel i9 14900K (F)
3.2-6.0GHz [24 Core(8 Power/16 Efficiency), 32 Threads]
Motherboard: Gigabyte Z790 Aorus Elite
Ram: 64GB DDR5 6000Mhz
Graphics: Nvidia RTX 4090 24GB
SSD: Western Digital SN850X 2TB PCIE 4.0 NVME
Power: Seasonic GX-1000 80Plus Gold ATX 3.0
Case: Gaming Mid-Sized Case
Cooler: 240MM/280MM/360MM Liquid Cooler
(Corsair/NZXT/DeepCool/Arctic)

Price: 6,100,000

- Add 40,000 to Upgrade Motherboard with integrated WIFI/BT

AMD Gaming Desktop

Tier 7

CPU: AMD Ryzen 5 9600X
3.9-5.4GHz (6 Core, 12 Threads)
Motherboard: Gigabyte B650M Aorus Elite
Ram: 32GB DDR5 6000Mhz
Graphics: Nvidia RTX 4070 TI Super 16GB
SSD: Western Digital SN850X 2TB PCIE 4.0 NVME
Power: Seasonic GX-850 80Plus Gold
Case: Gaming Mid-Sized Case
Cooler: DeepCool AK620

Price: 3,040,000

- Add 130,000 to upgrade CPU to the AMD Ryzen 7 9700X
3.8-5.5GHz (8 Cores, 16 Threads)
- Add 300,000 to upgrade GPU to the RTX 4080 Super 16GB
- Add 40,000 to Upgrade Motherboard with integrated WIFI/BT

Tier 8

CPU: AMD Ryzen 7 9700X
3.8-5.5GHz (8 Core, 16 Threads)
Motherboard: Gigabyte X670 Aorus Elite
Ram: 32GB DDR5 6000Mhz
Graphics: Nvidia RTX 4080 Super 16GB
SSD: Western Digital SN850X 2TB PCIE 4.0 NVME
Power: Seasonic GX-1000 80Plus Gold ATX 3.0
Case: Gaming Mid-Sized Case
Cooler: 240MM/280MM/360MM Liquid Cooler
(Corsair/NZXT/DeepCool/Arctic)

Price: 3,870,000

- Add 150,000 to upgrade the RAM to 64GB (32GBx2)
- Add 1,850,000 to upgrade GPU to the RTX 4090 24GB
- Add 40,000 to Upgrade Motherboard with integrated WIFI/BT

Tier 9

CPU: AMD Ryzen 9 9950X
4.3-5.7GHz (16 Core, 32 Threads)
Motherboard: Gigabyte X670 Aorus Elite
Ram: 64GB DDR5 6000Mhz
Graphics: Nvidia RTX 4090 24GB
SSD: Western Digital SN850X 2TB PCIE 4.0 NVME
Power: Seasonic GX-1000 80Plus Gold ATX 3.0
Case: Gaming Mid-Sized Case
Cooler: 240MM/280MM/360MM Liquid Cooler
(Corsair/NZXT/DeepCool/Arctic)

Price: 6,480,000

- Add 40,000 to Upgrade Motherboard with integrated WIFI/BT

These high ranged gaming desktops aim for maximum performance.
