

Phil's Computer Repository is committed to providing the best shopping experience for your new desktop. All desktops have been carefully selected to maximize reliability and performance to price ratio.

## Office PC

Office-use desktops are designed with an emphasis on the CPU to allow for multitasking, Microsoft Office documents, and browsing the web. The cases are chosen to be as small and minimalistic as possible with no flashy lights or distractions for the office environment.

## Gaming Desktops

Modern gaming desktops are able to perform as an all-around system for any intensive tasks such as gaming, streaming, 3D rendering, and video editing. Different gaming desktop tiers are available with either Intel or AMD Ryzen processors.

Phil's Computer Repository is committed to providing the best shopping experience for your new desktop. All desktops have been carefully selected to maximize reliability and performance to price ratio.

## How it works

### 1. Select your build

Select your preferred build in the following pages. Each Tier is comprised of balanced systems at different price points. Further customizations are possible upon customer Request.

### 2. Select your case

Once you have selected your preferred build, you can choose your case. The case is one of the only components that the customer can choose to show off their stylistic preferences. You can choose any case in the Gaming Mid-Tower Cases section. Premium cases are available for an extra cost.

### 3. Select accessories/upgrades if required

Once you have your build and case selected, you can decide to purchase accessories, upgrades, or peripherals.

### 4. Choose payment option and shipping/delivery method

Most customers prefer to conduct payment via a **Korean Bank Transfer** as it is easy and immediate. Customers can also pay in cash in person, Credit Card, or PayPal. Please keep in mind that paying by Credit Card or PayPal incurs additional fees. If the payment is processed by noon of a given business day (weekday), the desktop will typically be built by the evening of the same business day. Once the desktop is ready, customers can pick it up in person, ask to have it shipped, or sent by Quick Service Courier (only for Seoul and Greater Seoul Residents). Shipping is free for all computer purchases, typically takes one business day, and is fully insured.

Phil's Computer Repository is committed to providing the best shopping experience for your new desktop. All desktops have been carefully selected to maximize reliability and performance to price ratio.

## Included Software

Genuine English Windows 11 Pro (Other Languages are available upon request)  
All necessary drivers and utilities  
No Bloatware

## Warranty Policy

All of the desktops featured in this document use brand new components unless otherwise requested. Every new computer purchase is accompanied with a 1 year parts and labor warranty. Additionally, all of the individual components will carry their own manufacturer's warranty which vary between 3-10 years depending on the component and the brand.

The 1 Year Parts and Labor Warranty covers the following, but is not limited to:

- Components that fail with no fault of the user
- Damages incurred from shipping
- Glitches in Windows due to a corrupted windows installation, updates and/or drivers

The Parts and Labor Warranty Policy does not cover:

- Hardware failure due to improper overclocking
- Any user-inflicted damage (ex. liquid damage, physical trauma, bug infestation, etc.)
- Return shipping costs for warranty coverage.

In the event that repairs are needed but are not covered under the 1 year warranty policy or after the 1 year period, Phil's Computer Repository will conduct repairs at normal customer rates.

Phil's Computer Repository is committed to providing the best shopping experience for your new desktop. All desktops have been carefully selected to maximize reliability and performance to price ratio.

## FAQ

### **Q. What brands do you use for your builds?**

**A.** Following the philosophy of maximizing reliability, reputable international brands are used for every component.

**SSD:** Western Digital, Micron Crucial, Samsung

**Graphics Card:** Gigabyte, MSI, Asus, Zotac, Galax, PNY, Colorful, Emtek, Palit, Manli

**Motherboard:** Gigabyte, Asus, MSI, Asrock

**Ram:** Samsung, G.Skill, TeamGroup, Corsair, Micron Crucial, ADATA

**Power Supply:** Antec, Corsair, Seasonic, EVGA

**Coolers:** Corsair, DeepCool, NZXT, Arctic

### **Q. How are the prices for each build calculated?**

**A.** The prices for each build is broken down to the total retail cost of the components (Danawa Virtual Estimate Prices) + 100-250,000 KRW for the professional physical assembly, software package which includes Genuine Windows, and the 1 Year Parts and Labor Warranty Policy.

### **Q. Is the software that is included with each build genuine?**

**A.** All of the software, including Windows, is genuine.

### **Q. (For American customers) I have noticed that prices of several components in Korea are more expensive than what I can get from home.**

#### **What are the advantages with ordering through you?**

**A.** For brand name consumer electronics, which includes computer components, the USA has the cheapest market in the world. However, any potential customer should also calculate additional shipping and customs fees when importing electronics from overseas. Customers should also keep in mind that if any of those items require warranty support, they would have to ship it back to the USA at the buyer's expense and wait weeks/months for warranty support. On the other hand, the turnaround time for warranty support in Korea is typically several days.

## Office PC

### Basic Tier

**CPU:** Intel i3 14100  
3.50-4.70GHz (4 Core, 8 Threads)  
**Motherboard:** Asrock B760M-HDV/M2 D5 Wifi6E/BT  
**Ram:** 8GB DDR5 5600Mhz  
**Graphics:** Intel Graphics  
**SSD:** 500GB SSD NVME M.2  
**Power:** M-ATX 450W  
**Case:** 2MONs L-POSE 8 Type C

**Price: 699,000**

- Add 40,000 to upgrade the SSD to 1TB (110,000 for 2TB)
- Add 30,000 to upgrade the RAM to 16GB (100,000 for 32G)

### Intermediate Tier

**CPU:** Intel i5 14400  
2.5-4.7GHz [10 Core(6 Power/4 E), 16 Threads]  
**Motherboard:** Asrock B760M-HDV/M2 D5 Wifi6E/BT  
**Ram:** 16GB DDR5 5600Mhz  
**Graphics:** Intel Graphics  
**SSD:** 500GB NVME M.2 SSD  
**Power:** M-ATX 450W  
**Case:** 2MONs L-POSE 8 Type C

**Price: 834,000**

- Add 40,000 to upgrade the SSD to 1TB (110,000 for 2TB)
- Add 70,000 to upgrade the RAM to 32GB

### Advanced Tier

**CPU:** Intel i7 14700  
2.1-5.4GHz [20 Core(8 Power/12 E), 28 Threads]  
**Motherboard:** Asrock B760M-HDV/M2 D5 Wifi6E/BT  
**Ram:** 32GB DDR5 5600Mhz  
**Graphics:** Intel Graphics  
**SSD:** 500GB NVME M.2 SSD  
**Power:** M-ATX 450W  
**Case:** 2MONs L-POSE 8 Type C

**Price: 1,144,000**

- Add 40,000 to upgrade the SSD to 1TB (110,000 for 2TB)

These entry tier gaming desktops are great for those who want to play casual games such as League of Legends, Fortnite, Apex Legends, Dota 2, and other popular games that don't require high-end hardware.

## Tier 1-3 (out of 9)

### AMD Gaming Desktop

#### Tier 1

**CPU:** AMD Ryzen 5 8500G  
3.50-5.0GHz (6 Core, 12 Threads)  
**Motherboard:** MSI B650M-P  
**Ram:** 16GB DDR5 5600Mhz  
**Graphics:** AMD Integrated Radeon Graphics  
**SSD:** 500GB SSD NVME M.2  
**Power:** Antec CSK 650 80Plus Bronze  
**Case:** Gaming Mid-Sized Case

**Price: 859,000**

- Add 180,000 to upgrade the CPU to the Ryzen 7 8700G 4.2-5.1GHz (8 core, 16 Threads)
- Add 70,000 to upgrade the Ram to 32GB DDR5 5600Mhz
- Add 40,000 to upgrade the SSD to 1TB (110,000 for 2TB)
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

#### Tier 2

**CPU:** AMD Ryzen 5 5600  
3.5-4.4GHz (6 Core, 12 Threads)  
**Motherboard:** Gigabyte B550M Aorus Elite  
**Ram:** 16GB DDR4 3200Mhz  
**Graphics:** Nvidia RTX 3050 8GB  
**SSD:** 500GB SSD NVME M.2  
**Power:** Antec CSK 650 80Plus Bronze  
**Case:** Gaming Mid-Sized Case

**Price: 1,014,000**

- Add 60,000 to upgrade the Ram to 32GB 3200Mhz
- Add 40,000 to upgrade the SSD to 1TB (110,000 for 2TB)
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

#### Tier 3

**CPU:** AMD Ryzen 5 5600  
3.5-4.4GHz (6 Core, 12 Threads)  
**Motherboard:** Gigabyte B550M Aorus Elite  
**Ram:** 16GB DDR4 3200Mhz  
**Graphics:** Nvidia RTX 4060 8GB  
**SSD:** 500GB SSD NVME M.2  
**Power:** Antec CSK 650 80Plus Bronze  
**Case:** Gaming Mid-Sized Case

**Price: 1,234,000**

- Add 60,000 to upgrade the Ram to 32GB 3200Mhz
- Add 40,000 to upgrade the SSD to 1TB (110,000 for 2TB)
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

## Intel Gaming Desktop

These mid ranged gaming desktops are great for those who want to maximize the price to performance ratio and play most games on High+ Settings.

### Tier 4

**CPU:** Intel i5 14400 (F)  
2.5-4.7GHz [10 Core(6 Power/4 Efficiency), 16 Threads]  
**Motherboard:** MSI B760M-P  
**Ram:** 16GB DDR5 5600Mhz  
**Graphics:** Nvidia RTX 4060 8GB  
**SSD:** 500GB SSD NVME M.2  
**Power:** Antec CSK 650 80Plus Bronze  
**Case:** Gaming Mid-Sized Case

**Price: 1,439,000**

- Add 40,000 to upgrade the SSD to 1TB (110,000 for 2TB)
- Add 70,000 to upgrade the Ram to 32GB
- Add 45,000 to add the DeepCool AK400 Aftermarket Cooler (Intel Stock Cooler used otherwise)
- Add 30,000 to upgrade Motherboard with integrated WIFI/BT

### Tier 5

**CPU:** Intel i5 14400 (F)  
2.5-4.7GHz [10 Core(6 Power/4 Efficiency), 16 Threads]  
**Motherboard:** MSI B760M-P  
**Ram:** 32GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5060 TI 16GB  
**SSD:** Western Digital SN580 1TB NVME  
**Power:** Antec CSK 650 80Plus Bronze  
**Case:** Gaming Mid-Sized Case  
**Cooler:** DeepCool AK400

**Price: 1,909,000**

- Add 80,000 to upgrade the SSD to 2TB NVME M.2
- Add 30,000 to upgrade Motherboard with integrated WIFI/BT

### Tier 6

**CPU:** Intel i5 14600K (F)  
3.5-5.3GHz [14 Core(6 Power/8 Efficiency), 20 Threads]  
**Motherboard:** Gigabyte B760M Aorus Elite  
**Ram:** 32GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5070 12GB  
**SSD:** WD Black SN850X 1TB PCIE 4.0 NVME  
**Power:** EVGA 750 GA 80Plus Gold  
**Case:** Gaming Mid-Sized Case  
**Cooler:** DeepCool AK620

**Price: 2,509,000**

- Add 220,000 to upgrade the CPU to the Intel I7 14700K(F)
- Add 100,000 to upgrade the SSD to 2TB NVME M.2
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT
- Add 50,000 to upgrade Graphic Card to the **AMD Radeon 9070 16GB**

## AMD Gaming Desktop

### Tier 4

**CPU:** AMD Ryzen 5 7500F  
3.7-5.0GHz (6 Core, 12 Threads)  
**Motherboard:** MSI B650M-P  
**Ram:** 16GB DDR5 5600Mhz  
**Graphics:** Nvidia RTX 4060 8GB  
**SSD:** 500GB SSD NVME M.2  
**Power:** Antec CSK 650 80Plus Bronze  
**Case:** Gaming Mid-Sized Case

**Price: 1,399,000**

- Add 40,000 to upgrade the SSD to 1TB (110,000 for 2TB)
- Add 70,000 to upgrade the Ram to 32GB
- Add 45,000 to add the DeepCool AK400 Aftermarket Cooler (AMD Stock Cooler used otherwise)
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

### Tier 5

**CPU:** AMD Ryzen 5 7500F  
3.7-5.0GHz (6 Core, 12 Threads)  
**Motherboard:** MSI B650M-P  
**Ram:** 32GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5060 TI 16GB  
**SSD:** Western Digital SN580 1TB NVME  
**Power:** Antec CSK 650 80Plus Bronze  
**Case:** Gaming Mid-Sized Case  
**Cooler:** DeepCool AK400

**Price: 1,919,000**

- Add 80,000 to upgrade the SSD to 2TB NVME M.2
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

### Tier 6

**CPU:** AMD Ryzen 5 7600X  
4.7-5.3GHz (6 Core, 12 Threads)  
**Motherboard:** Gigabyte B650M Aorus Elite  
**Ram:** 32GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5070 12GB  
**SSD:** WD Black SN850X 1TB PCIE 4.0 NVME  
**Power:** EVGA 750 GA 80Plus Gold  
**Case:** Gaming Mid-Sized Case  
**Cooler:** DeepCool AK620

**Price: 2,499,000**

- Add 100,000 to upgrade the CPU to the AMD Ryzen 5 9600X 3.9-5.4 GHz (6 Core, 12 Threads) (**200,000 for AMD Ryzen 7 9700X**)
- Add 100,000 to upgrade the SSD to 2TB NVME M.2
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT
- Add 50,000 to upgrade Graphic Card to the **AMD Radeon 9070 16GB**

These high ranged gaming desktops aim for maximum performance.

## Intel Gaming Desktop

### Tier 7

**CPU:** Intel i5 14600K (F)  
3.5-5.3GHz [14 Core(6 Power/8 Efficiency), 20 Threads]  
**Motherboard:** Gigabyte B760M Aorus Elite  
**Ram:** 32GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5070 TI 16GB  
**SSD:** Western Digital SN850X 2TB PCIE 4.0 NVME  
**Power:** Seasonic GX-850 80Plus Gold  
**Case:** Gaming Mid-Sized Case  
**Cooler:** DeepCool AK620

**Price: 3,120,000**

- Add 120,000 to upgrade CPU to the Intel i7 14700K(F)
- Add 150,000 to upgrade the RAM to 64GB (32GBx2)
- Add 590,000 to upgrade GPU to the RTX 5080 + 1000W PSU
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

### Tier 8

**CPU:** Intel i7 14700K (F)  
3.4-5.6GHz [16 Core(8 Power/8 Efficiency), 24 Threads]  
**Motherboard:** Gigabyte Z790 Aorus Elite  
**Ram:** 32GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5080 16GB  
**SSD:** Western Digital SN850X 2TB PCIE 4.0 NVME  
**Power:** Seasonic GX-1000 80Plus Gold ATX 3.0  
**Case:** Gaming Mid-Sized Case  
**Cooler:** 240MM/280MM/360MM Liquid Cooler (DeepCool/Arctic)

**Price: 4,240,000**

- Add 200,000 to upgrade CPU to the Intel i9 14900K (F)
- Add 150,000 to upgrade the RAM to 64GB (32GBx2)
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT
- Add 260,000 to upgrade SSD to 4TB

### Tier 9

**CPU:** Intel i9 14900K (F)  
3.2-6.0GHz [24 Core(8 Power/16 Efficiency), 32 Threads]  
**Motherboard:** Gigabyte Z790 Aorus Elite  
**Ram:** 64GB DDR5 6000Mh  
**Graphics:** Nvidia RTX 5080 16GB  
**SSD:** Western Digital SN850X 2TB PCIE 4.0 NVME  
**Power:** Seasonic GX-1000 80Plus Gold ATX 3.0  
**Case:** Gaming Mid-Sized Case  
**Cooler:** 240MM/280MM/360MM Liquid Cooler (DeepCool/Arctic)

**Price: 4,580,000**

- Add 40,000 to upgrade Motherboard with integrated WIFI/BT
- Add 260,000 to upgrade SSD to 4TB
- Add 3,400,000 to upgrade GPU to Nvidia RTX 5090 32GB

## AMD Gaming Desktop

### Tier 7

**CPU:** AMD Ryzen 5 9600X  
3.9-5.4GHz (6 Core, 12 Threads)  
**Motherboard:** Gigabyte B650M Aorus Elite  
**Ram:** 32GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5070 TI 16GB  
**SSD:** Western Digital SN850X 2TB PCIE 4.0 NVME  
**Power:** Seasonic GX-850 80Plus Gold  
**Case:** Gaming Mid-Sized Case  
**Cooler:** DeepCool AK620

**Price: 3,190,000**

- Add 100,000 to upgrade CPU to the AMD Ryzen 7 9700X  
3.8-5.5GHz (8 Cores, 16 Threads) **(470,000 for Ryzen 7 9800X3D)**
- Add 150,000 to upgrade the RAM to 64GB (32GBx2)
- Add 590,000 to upgrade GPU to the RTX 5080 + 1000W PSU
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT

### Tier 8

**CPU:** AMD Ryzen 7 9700X  
3.8-5.5GHz (8 Core, 16 Threads)  
**Motherboard:** Gigabyte X870 Aorus Elite  
**Ram:** 32GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5080 16GB  
**SSD:** Western Digital SN850X 2TB PCIE 4.0 NVME  
**Power:** Seasonic GX-1000 80Plus Gold ATX 3.0  
**Case:** Gaming Mid-Sized Case  
**Cooler:** 240MM/280MM/360MM Liquid Cooler (DeepCool/Arctic)

**Price: 4,210,000**

- Add 370,000 to upgrade the CPU to the AMD Ryzen 7 9800X3D
- Add 150,000 to upgrade the RAM to 64GB (32GBx2)
- Add 40,000 to upgrade Motherboard with integrated WIFI/BT
- Add 260,000 to upgrade SSD to 4TB

### Tier 9

**CPU:** AMD Ryzen 9 9950X  
4.3-5.7GHz (16 Core, 32 Threads)  
**Motherboard:** Gigabyte X870 Aorus Elite  
**Ram:** 64GB DDR5 6000Mhz  
**Graphics:** Nvidia RTX 5080 16GB  
**SSD:** Western Digital SN850X 2TB PCIE 4.0 NVME  
**Power:** Seasonic GX-1000 80Plus Gold ATX 3.0  
**Case:** Gaming Mid-Sized Case  
**Cooler:** 240MM/280MM/360MM Liquid Cooler (DeepCool/Arctic)

**Price: 4,910,000**

- Add 40,000 to upgrade Motherboard with integrated WIFI/BT
- Add 260,000 to upgrade SSD to 4TB
- Add 200,000 to upgrade the CPU to Ryzen 7 9950X3D
- Add 3,400,000 to upgrade GPU to Nvidia RTX 5090 32GB

These cases are calculated into the build price.  
They do not cost more.

## Gaming Mid-Sized Cases

### 3RSYS L600 Quiet BLK/White

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 2 Audio Jacks  
Fans: 3 x 140mm front fans, 1 x 140mm rear fan  
D (484mm) x W (233mm) x H (487mm)  
Case has no RGB

### Cougar Duoface RGB Black/White

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 1 x USB 2.0, 1 Audio Jack  
Fans: 3 x 120mm RGB front fans, 1 x 120mm RGB rear fan  
D (465mm) x W (240mm) x H (496mm)  
Case has a RGB button on top of the case to cycle through colors

### 3Rsys L900 Black

Front I/O: 2 x USB 3.0, 2 x USB 2.0, 2 Audio Jacks, SD Card  
Fans: 2 x 140mm front fans, 1 x 120mm rear fan  
D (472mm) x W (230mm) x H (465mm)  
Case has no RGB and has acoustic foam in side panels

### DarkFlash DLX21 RGB Mesh Black/White

Front I/O: 1 x USB 3.0, 1 x USB Type-C, 1 x USB 2.0, 2 Audio Jacks  
Fans: 3 x 140mm RGB front fans, 1 x 140mm RGB rear fan  
D (448mm) x W (233mm) x H (493mm)  
Case has a RGB button on top of the case to cycle through colors

Small Case. Recommended only for Tiers 1-5

### DarkFlash DLM21 White/Black

Front I/O: 1 x USB 3.0, 2 x USB 2.0, 2 Audio Jacks  
Fans: 3 x 120mm RGB front fans, 1 x 120mm RGB rear fan  
D (376mm) x W (208mm) x H (425mm)  
Case has a RGB button on top of the case to cycle through colors

Small Case. Recommended only for Tiers 1-4

### DarkFlash DLM22 RGB White/Pink

Front I/O: 1 x USB 3.0, 2 x USB 2.0, 2 Audio Jacks  
Fans: 1 x 120mm RGB rear fan  
D (362mm) x W (208mm) x H (425mm)  
Case has a RGB button on top of the case to cycle through colors

## Premium Cases - NZXT

### NZXT H5 Flow V2 White/Black

Front I/O: 1 x USB 3.0, 1 x USB Type-C, 1 Audio Jack  
Fans: 1 x 120mm front fan, 1 x 120mm rear fan  
D (430mm) X W (225mm) X H (465mm)  
Case has no RGB

**Upgrade from Mid Size Case for 50,000**

Add 2 additional 120mm Front fans for 60,000

### NZXT H5 Flow RGB V2 Black/White

Front I/O: 1 x USB 3.0, 1 x USB Type-C, 1 Audio Jack  
Fans: 3 x 120mm RGB front fans, 1 x 120mm rear fan  
D (465mm) x W (240mm) x H (496mm)  
Fan RGB can be customized via NZXT Cam Software

**Upgrade from Mid Size Case for 50,000**

### NZXT H5 Elite Black/White

Front I/O: 1 x USB 3.0, 1 x USB Type-C, 1 Audio Jack  
Fans: 2 x 140mm RGB front fans, 1 x 120mm rear fan  
D (446mm) x W (227mm) x H (464mm)  
Fan RGB can be customized via NZXT Cam Software

**Upgrade from Mid Size Case for 70,000**

### NZXT H7 Flow v2 White/Black

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 1 Audio Jack  
Fans: 3 x 120mm front fan  
D (468mm) X W (244mm) X H (544mm)  
Case has no RGB

**Upgrade from Mid Size Case for 100,000**

Add 1 additional 120mm Front fan for 30,000  
Add 3 additional 120mm Bottom Fans for 90,000

### NZXT H7 Flow RGB V2 White/Black

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 1 Audio Jack  
Fans: 3 x 120mm front fan  
D (468mm) X W (244mm) X H (544mm)  
Fan RGB can be customized via NZXT Cam Software

**Upgrade from Mid Size Case for 150,000**

Add 1 additional 120mm Front fan for 30,000  
Add 3 additional RGB 120mm Bottom Fans for 120,000

### NZXT H9 Flow Black/White

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 1 Audio Jack  
Fans: 3 x 120mm front fans, 1 x 120mm rear fan  
D (466mm) x W (290mm) x H (465mm)  
Case has no RGB

**Upgrade from Mid Size Case for 150,000**

Add 3 additional 120mm Bottom Fans for 90,000

### NZXT H9 Elite Black/White

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 1 Audio Jack  
Fans: 3 x 120mm front fans, 1 x 120mm rear fan  
D (466mm) x W (290mm) x H (465mm)  
Case has no RGB

**Upgrade from Mid Size Case for 260,000**

Add 3 additional 120mm Bottom Fans for 90,000

## Premium Cases - Fractal Design

**North White  
TG Clear Tint**  
Tempered Glass Side Panel

**North White  
Mesh**  
Mesh Side Panel

**North Charcoal  
TG Dark Tint**  
Tempered Glass Side Panel

**North Charcoal  
Mesh**  
Mesh Side Panel

D (447mm) x W (215mm) x H (469mm)  
Front I/O: 2 x USB 3.0, 1 x USB Type-C, 2 Audio Jacks  
Fans: 2 x 140mm front fans

**Upgrade from Mid Size Case for 150,000**

# Premium Cases - Thermaltake 'The Tower 300'

Black

Bubble Pink
