

Office PC

Office-use desktops are designed with an emphasis on the CPU to allow for multitasking, Microsoft Office documents, and browsing the web. The cases are chosen to be as small and minimalistic as possible with no flashy lights or distractions for the office environment.

Gaming Desktops

Modern gaming desktops are able to perform as an all-around system for any intensive tasks such as gaming, streaming, 3D rendering, and video editing. Different gaming desktop tiers are available with either Intel or AMD Ryzen processors.

Phil's Computer Repository is committed to providing the best shopping experience for your new desktop. All desktops have been carefully selected to maximize reliability and performance to price ratio.

How it works

1. Select your build

Select your preferred build in the following pages. Each Tier is comprised of balanced systems at different price points. Further customizations are possible upon customer Request.

2. Select your case

Once you have selected your preferred build, you can choose your case. The case is one of the only components that the customer can choose to show off their stylistic preferences. You can choose any case in the Gaming Mid-Tower Cases section. Premium cases are available for an extra cost.

3. Select accessories/upgrades if required

Once you have your build and case selected, you can decide to purchase accessories, upgrades, or peripherals.

4. Choose payment option and shipping/delivery method

Most customers prefer to conduct payment via a Korean Bank Transfer as it is easy and immediate. Customers can also pay in cash in person, Credit Card, or PayPal. Please keep in mind that paying by Credit Card or PayPal incurs additional fees. If the payment is processed by noon of a given business day (weekday), the desktop will typically be built by the evening of the same business day. Once the desktop is ready, customers can pick it up in person, ask to have it shipped, or sent by Quick Service Courier (only for Seoul and Greater Seoul Residents). Shipping is free for all computer purchases, typically takes one business day, and is fully insured.

phil'scomputerrepository.com

Included Software

Genuine English Windows 11 Pro (Other Languages are available upon request)

All necessary drivers and utilities

No Bloatware

Warranty Policy

All of the desktops featured in this document use brand new components unless otherwise requested. Every new computer purchase is accompanied with a 1 year parts and labor warranty. Additionally, all of the individual components will carry their own manufacturer's warranty which vary between 3-10 years depending on the component and the brand.

The 1 Year Parts and Labor Warranty covers the following, but is not limited to:

- Components that fail with no fault of the user
- Damages incurred from shipping
- Glitches in Windows due to a corrupted windows installation, updates and/or drivers

The Parts and Labor Warranty Policy does not cover:

- Hardware failure due to improper overclocking
- Any user-inflicted damage (ex. liquid damage, physical trauma, bug infestation, etc.)
- Return shipping costs for warranty coverage.

In the event that repairs are needed but are not covered under the 1 year warranty policy or after the 1 year period, Phil's Computer Repository will conduct repairs at normal customer rates.

Frequently asked questions:

Q. What brands do you use for your builds?

A. Following the philosophy of maximizing reliability, reputable international brands are used for every component.

SSD: Western Digital, Micron Crucial, Samsung

Graphics Card: Gigabyte, MSI, Asus, Zotac, Galax, PNY, Colorful, Emtek, Palit, Manli

Motherboard: Gigabyte, Asus, MSI, Asrock

Ram: Samsung, G.Skill, TeamGroup, Corsair, Micron Crucial, ADATA

Power Supply: Antec, Corsair, Seasonic, EVGA

Coolers: Corsair, DeepCool, NZXT, Arctic

Q. How are the prices for each build calculated?

A. The prices for each build is broken down to the total retail cost of the components (Danawa Virtual Estimate Prices) + 100-250,000 KRW for the professional physical assembly, software package which includes Genuine Windows, and the 1 Year Parts and Labor Warranty Policy.

Q. Is the software that is included with each build genuine?

A. All of the software, including Windows, is genuine.

~~**Q.** (For American customers) I have noticed that prices of several components in Korea are more expensive than what I can get from home.~~

~~What are the advantages with ordering through you?~~

~~**A.** For brand name consumer electronics, which includes computer components, the USA has the cheapest market in the world. However, any potential customer should also calculate additional shipping and customs fees when importing electronics from overseas. Customers should also keep in mind that if any of those items require warranty support, they would have to ship it back to the USA at the buyer's expense and wait weeks/months for warranty support. On the other hand, the turnaround time for warranty support in Korea is typically several days.~~

No longer accurate due to US Tariffs.

Office PC

Basic Tier

CPU:	Intel Ultra5 225 3.3-4.9GHz [10 Core(6P/4E), 10 Threads]
M/B:	Giga H810M S2H
Ram:	8GB DDR5 5600Mhz
GPU:	Intel Integrated Graphics
SSD:	500GB NVME M.2
PSU:	FSP 300W 80PLUS Bronze
Case:	2MONs L-POSE 8 Type C
Wifi:	PCIE Wifi 6E

price: 949,000 KRW

- Add 110,000 to upgrade the RAM to 16GB
- Add 70,000 to upgrade the SSD to 1TB (150,000 for 2TB)

Intermediate Tier

CPU:	Intel Ultra5 235 3.4-5.0GHz [14 Core(6P/8E), 14 Threads]
M/B:	Giga H810M S2H
Ram:	16GB DDR5 5600Mhz (8GBx2)
GPU:	Intel Integrated Graphics
SSD:	500GB NVME M.2
PSU:	FSP 300W 80PLUS Bronze
Case:	2MONs L-POSE 8 Type C
Wifi:	PCIE Wifi 6E

price: 1,199,000 KRW

- Add 270,000 to upgrade the RAM to 32GB
- Add 70,000 to upgrade the SSD to 1TB (170,000 for 2TB)

Advanced Tier

CPU:	Intel Ultra7 265 2.4-5.3GHz [20 Core(8P/12E), 20 Threads]
M/B:	Giga H810M S2H
Ram:	32GB DDR5 5600Mhz (16GBx2)
GPU:	Intel Integrated Graphics
SSD:	1TB NVME M.2
PSU:	FSP 300W 80PLUS Bronze
Case:	2MONs L-POSE 8 Type C
Wifi:	PCIE Wifi 6E

price: 1,699,000 KRW

- Add 100,000 to upgrade the SSD to 2TB

These entry tier gaming desktops are great for those who want to play casual games such as League of Legends, Fortnite, Apex Legends, Dota 2, and other popular games.

Gaming Desktop

Tier 1

CPU:	AMD Ryzen 5 8600G 4.2-5.1GHz [6 Core, 12 Threads]
M/B:	MSI B850M-P
Ram:	16GB DDR5 5600Mhz (8GBx2)
GPU:	AMD Radeon Integrated
SSD:	WD Blue SN5000 500GB NVME M.2
PSU:	Antec CSK650W 80Plus Bronze
Case:	Midsized Gaming Case

price: 1,235,000 KRW

- Add 150,000 to upgrade the CPU to the Ryzen 7 8700G
 - 4.2-5.1GHz (8 core, 16 Threads)
- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 110,000 to upgrade the RAM to 16GB
- Add 70,000 to upgrade the SSD to 1TB (170,000 for 2TB)

Tier 2

CPU:	AMD Ryzen 5 8400F 4.2-4.7GHz [6 Core, 12 Threads]
M/B:	MSI B850M-P
Ram:	16GB DDR5 5600Mhz (8GBx2)
GPU:	Nvidia RTX 3050 6GB
SSD:	WD Blue SN5000 500GB NVME M.2
PSU:	Antec CSK650W 80Plus Bronze
Case:	Midsized Gaming Case

price: 1,405,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 270,000 to upgrade the RAM to 32GB
- Add 120.000 to upgrade the GPU to RTX 5050
- Add 70,000 to upgrade the SSD to 1TB (170,000 for 2TB)

Tier 3

CPU:	AMD Ryzen 5 8400F 4.2-4.7GHz [6 Core, 12 Threads]
M/B:	MSI B850M-P
Ram:	16GB DDR5 5600Mhz (8GBx2)
GPU:	Nvidia RTX 5060 8GB
SSD:	WD Blue SN5000 500GB NVME M.2
PSU:	Antec CSK650W 80Plus Bronze
Case:	Midsized Gaming Case

price: 1,615,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 270,000 to upgrade the RAM to 32GB
- Add 70,000 to upgrade the SSD to 1TB (170,000 for 2TB)

These mid ranged gaming desktops are great for those who want to maximize the price to performance ratio and play most games on High+ Settings.

Intel Tier 4

CPU:	Intel Core Ultra 5 225F 3.3-4.9GHz [10 Core(6P/4E), 10 Threads]
M/B:	Gigabyte B860M DS3H
Ram:	16GB DDR5 5600Mhz (8GBx2)
GPU:	Nvidia RTX 5060 TI 8GB
SSD:	WD Blue SN5000 500GB NVME M.2
PSU:	Antec CSK650W 80Plus Bronze
Case:	Midsized Gaming Case
Cooler:	DeepCool AK400

price: 1,870,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 100,000 to upgrade the GPU to RTX 5060 TI 16GB
- Add 270,000 to upgrade the RAM to 32GB
- Add 70,000 to upgrade the SSD to 1TB (170,000 for 2TB)

AMD Tier 4

CPU:	AMD Ryzen 5 8400F 4.2-4.7GHz [6 Core, 12 Threads]
M/B:	MSI B850M-P
Ram:	16GB DDR5 5600Mhz (8GBx2)
GPU:	Nvidia RTX 5060 TI 8GB
SSD:	WD Blue SN5000 500GB NVME M.2
PSU:	Antec CSK650W 80Plus Bronze
Case:	Midsized Gaming Case
Cooler:	DeepCool AK400

price: 1,800,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 100,000 to upgrade the GPU to RTX 5060 TI 16GB
- Add 270,000 to upgrade the RAM to 32GB
- Add 70,000 to upgrade the SSD to 1TB (170,000 for 2TB)

Intel Tier 5

CPU:	Intel Core Ultra 5 245K(F) 4.2-5.2GHz [14 Core(6P/8E), 14 Threads]
M/B:	Gigabyte B860M DS3H
Ram:	32GB DDR5 6000Mhz (16GBx2)
GPU:	Nvidia RTX 5060 TI 16GB
SSD:	WD Blue SN5000 1TB NVME M.2
PSU:	EVGA 750GQ 80Plus Gold
Case:	Midsized Gaming Case
Cooler:	DeepCool AK400

price: 2,435,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 190,000 to upgrade the GPU to RTX 5070 12GB
- Add 100,000 to upgrade the SSD to 2TB

AMD Tier 5

CPU:	AMD Ryzen 5 9600 3.8-5.2GHz [6 Core, 12 Threads]
M/B:	MSI B850M-P
Ram:	32GB DDR5 6000Mhz (16GBx2)
GPU:	Nvidia RTX 5060 TI 16GB
SSD:	WD Blue SN5000 1TB NVME M.2
PSU:	EVGA 750GQ 80Plus Gold
Case:	Midsized Gaming Case
Cooler:	DeepCool AK400

price: 2,415,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 190,000 to upgrade the GPU to RTX 5070 12GB
- Add 100,000 to upgrade the SSD to 2TB

Intel Tier 6

CPU:	Intel Core Ultra 5 245K(F) 4.2-5.2GHz [14 Core(6P/8E), 14 Threads]
M/B:	Gigabyte B860M Aorus Elite
Ram:	32GB DDR5 6000Mhz (16GBx2)
GPU:	Nvidia RTX 5070 12GB
SSD:	WD Blue SN5000 2TB NVME M.2
PSU:	EVGA 750GQ 80Plus Gold
Case:	Midsized Gaming Case
Cooler:	DeepCool AK620

price: 2,840,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 450,000 to upgrade the GPU to RTX 5070 TI 16GB

AMD Tier 6

CPU:	AMD Ryzen 5 9600X 3.9-5.4GHz [6 Core, 12 Threads]
M/B:	Gigabyte B850M Aorus Elite
Ram:	32GB DDR5 6000Mhz (16GBx2)
GPU:	Nvidia RTX 5070 12GB
SSD:	WD Blue SN5000 2TB NVME M.2
PSU:	EVGA 750GQ 80Plus Gold
Case:	Midsized Gaming Case
Cooler:	DeepCool AK620

price: 2,855,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 450,000 to upgrade the GPU to RTX 5070 TI 16GB

Intel Tier 7

CPU: Intel Core Ultra 7 265K(F)
3.9-5.5GHz [20 Core(8P/12E), 20 Threads]
M/B: Gigabyte B860M Aorus Elite
Ram: 32GB DDR5 6000Mhz (16GBx2)
GPU: Nvidia RTX 5070 TI 16GB
SSD: WD Black SN850X 2TB NVME M.2
PSU: Seasonic GX-850 80Plus Gold ATX 3.1
Case: Midsized Gaming Case
Cooler: DeepCool AK620

price: 3,650,000 KRW

- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 270,000 to upgrade the SSD to 4TB

AMD Tier 7

CPU: AMD Ryzen 7 9700X
3.8-5.5GHz (8 Core, 16 Threads)
M/B: Gigabyte B850M Aorus Elite
Ram: 32GB DDR5 6000Mhz (16GBx2)
GPU: Nvidia RTX 5070 TI 16GB
SSD: WD Black SN850X 2TB NVME M.2
PSU: Seasonic GX-850 80Plus Gold ATX 3.1
Case: Midsized Gaming Case
Cooler: DeepCool AK620

price: 3,585,000 KRW

- Add 300,000 to upgrade the CPU to the Ryzen 7 9800X3D
 - 4.7-5.2GHz (8 core, 16 Threads)
- Add 40,000 to upgrade Motherboard with WIFI/BT
- Add 270,000 to upgrade the SSD to 4TB

Intel Tier 8

CPU: Intel Core Ultra 7 265K(F)
3.9-5.5GHz [20 Core(8P/12E), 20 Threads]
M/B: Gigabyte Z890 Aorus Elite Wifi7
Ram: 32GB DDR5 6000Mhz (16GBx2)
GPU: Nvidia RTX 5080 16GB
SSD: WD Black SN850X 2TB NVME M.2
PSU: Seasonic GX-1000 80Plus Gold ATX 3.1
Case: Midsized Gaming Case
Cooler: DeepCool/Arctic 240/280/360 AIO

price: 4,500,000 KRW

- Add 480,000 to upgrade the RAM to 64GB
- Add 270,000 to upgrade the SSD to 4TB

AMD Tier 8

CPU: AMD Ryzen 7 9700X
3.8-5.5GHz (8 Core, 16 Threads)
M/B: Gigabyte X870 Aorus Elite Wifi7
Ram: 32GB DDR5 6000Mhz (16GBx2)
GPU: Nvidia RTX 5080 16GB
SSD: WD Black SN850X 2TB NVME M.2
PSU: Seasonic GX-1000 80Plus Gold ATX 3.1
Case: Midsized Gaming Case
Cooler: DeepCool/Arctic 240/280/360 AIO

price: 4,460,000 KRW

- Add 300,000 to upgrade the CPU to the Ryzen 7 9800X3D
 - 4.7-5.2GHz (8 core, 16 Threads)
- Add 480,000 to upgrade the RAM to 64GB
- Add 270,000 to upgrade the SSD to 4TB

Intel Tier 9

CPU: Intel Core Ultra 9 285K(F)
3.7-5.7GHz [24 Core(8P/16E), 24 Threads]
M/B: Gigabyte Z890 Aorus Elite Wifi7
Ram: 64GB DDR5 6000Mhz (32GBx2)
GPU: Nvidia RTX 5080 16GB
SSD: WD Black SN850X 2TB NVME M.2
PSU: Seasonic GX-1200 80Plus Gold ATX 3.1
Case: Midsized Gaming Case
Cooler: DeepCool/Arctic 240/280/360 AIO

price: 5,600,000 KRW

- Add 620,000 to upgrade the RAM to 128GB
- Add 2,800,000 to upgrade the GPU to the Nvidia RTX 5090 32G
- Add 270,000 to upgrade the SSD to 4TB

AMD Tier 9

CPU: AMD Ryzen 9 9950X
4.3-5.7GHz [16 Core, 32 Threads]
M/B: Gigabyte X870 Aorus Elite Wifi7
Ram: 64GB DDR5 6000Mhz (32GBx2)
GPU: Nvidia RTX 5080 16GB
SSD: WD Black SN850X 2TB NVME M.2
PSU: Seasonic GX-1200 80Plus Gold ATX 3.1
Case: Midsized Gaming Case
Cooler: DeepCool/Arctic 240/280/360 AIO

price: 5,520,000 KRW

- Add 180,000 to upgrade the CPU to the Ryzen 7 9950X3D
 - 4.3-5.7GHz (16 core, 32 Threads)
- Add 620,000 to upgrade the RAM to 128GB
- Add 2,800,000 to upgrade the GPU to the Nvidia RTX 5090 32G
- Add 270,000 to upgrade the SSD to 4TB

Gaming Mid-Sized Cases

3RSYS L600 Quiet BLK/White

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 2 Audio Jacks
Fans: 3 x 140mm front fans, 1 x 140mm rear fan
D (484mm) x W (233mm) x H (487mm)
Case has no RGB

Cougar Duoface RGB Black/White

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 1 x USB 2.0, 1 Audio Jack
Fans: 3 x 120mm RGB front fans, 1 x 120mm RGB rear fan
D (465mm) x W (240mm) x H (496mm)
Case has a RGB button on top of the case to cycle through colors

3RSYS L900 Black

Front I/O: 2 x USB 3.0, 2 x USB 2.0, 2 Audio Jacks, SD Card
Fans: 2 x 140mm front fans, 1 x 120mm rear fan
D (472mm) x W (230mm) x H (465mm)
Case has no RGB and has acoustic foam in side panels

DEEPCOOL CH260 White/Black

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 1 Audio Jack
Fans: 0 Fans by default
D (438mm) x W (225mm) x H (312.5mm)
Case has no RGB

DarkFlash DLX21 RGB Mesh Black/White

Front I/O: 1 x USB 3.0, 1 x USB Type-C, 1 x USB 2.0, 2 Audio Jacks
Fans: 3 x 140mm RGB front fans, 1 x 140mm RGB rear fan
D (448mm) x W (233mm) x H (493mm)
Case has a RGB button on top of the case to cycle through colors

DarkFlash DLM21 White/Black

Front I/O: 1 x USB 3.0, 2 x USB 2.0, 2 Audio Jacks
Fans: 3 x 120mm RGB front fans, 1 x 120mm RGB rear fan
D (376mm) x W (208mm) x H (425mm)
Case has a RGB button on top of the case to cycle through colors

DarkFlash DLM22 RGB White/Pink

Front I/O: 1 x USB 3.0, 2 x USB 2.0, 2 Audio Jacks
Fans: 1 x 120mm RGB rear fan
D (362mm) x W (208mm) x H (425mm)
Case has a RGB button on top of the case to cycle through colors

DEEPCOOL CH270 Digital White/Black

Front I/O: 2 x USB 3.0, 1 x USB Type-C, 1 Audio Jack, SD Card
Fans: 0 Fans by default
D (296mm) x W (225mm) x H (486mm)
Case has no RGB

These cases are calculated into the build price.
They do not cost more.
